

Improve your fleet with the right Fleet Maintenance Partner!

Who is Dossier Systems?

Dossier Systems is the nationally recognized leading provider of intuitive fleet maintenance management software solutions. Dossier enables executives, fleet managers, and line staff to capture, measure, and analyze the dynamics of their fleet maintenance and operating costs, and provide the advanced reporting with decision support tools to deliver real results.

Dossier and Zonar: 1+1=3

Augmenting your Zonar installation with Dossier is truly a solution where the whole is greater than the sum of the parts. The Dossier On-Board with Zonar option delivers real optimization of your workflows and processes. Not only is double data entry eliminated, but downtime is also reduced while lead time and miscommunications are eliminated from your process.

Any Zonar EVIR inspection failure automatically creates a Work Pending (WP) in Dossier's system that drives the repair workflow – with a repair confirmation sent back to your Zonar system. This action supports compliance, saves labor and speeds processes to help get your vehicle back into service faster. Dossier can also update meters and auto-create WP items based on a vehicle's ECM data from Zonar's telematics. WPs based on ECM Diagnostic Codes speed repairs because the shop will have advance knowledge on the problem, and can have the parts and technicians ready as soon as the vehicle is available.

Reduced downtime & costs
Optimized asset selection & specification
Improved safety & compliance
Optimized vendor spending

Reduced parts costs
Reduced excess & obsolete inventory
Extended equipment life
Increased mechanic productivity
